

# ChatGPT & AI Cheatsheet

v2 · 2026

The clean one-page reference for prompting like a pro

## THE UNIVERSAL PROMPT FORMULA

Act as **[ROLE]**, perform **[TASK]**, in **[FORMAT]**

**EX** Act as a **senior copywriter**, write **5 cold-email subject lines** for a SaaS launch, in a **numbered list with hooks bolded**.

### 1 ROLES

Who should ChatGPT pretend to be?

Marketer Copywriter  
SEO specialist Consultant  
Coder Editor Analyst  
Recruiter Teacher Translator  
Interviewer Trainer CFO  
Designer

Or specific people: "Act like Hormozi / Bezos / Naval"

### 2 TASKS

What do you want it to do?

Write caption Blog post  
Email sequence Sales copy  
Product desc Video script  
SEO keywords Summarize  
Translate Outline Analyze  
Brainstorm Critique Refactor

### 3 OUTPUT FORMATS

How should the answer look?

Bullet list Numbered list Table  
CSV JSON Markdown HTML  
Summary Outline  
Step-by-step Pros vs Cons  
Tweet thread Script Email

## PROMPTING TECHNIQUES

#### Zero-shot

Just ask. No examples. Use for simple, well-known tasks.

#### One-shot

Give one example before the ask. Sets tone fast.

#### Few-shot

3-5 examples. Best for matching a specific style or pattern.

#### Chain-of-Thought

Add "think step by step." Forces reasoning before the answer.

#### Tree-of-Thought

"Brainstorm 5 approaches, evaluate each, then pick the best."

#### Role-play

"You are X." Locks tone, vocabulary, and POV.

#### Chained prompts

Output of prompt 1 becomes input to prompt 2. Compounds quality.

#### Instructional

Explicit steps. "First do A, then B, then return C."

## PRIMING: ZERO → ONE → FEW-SHOT

**ZERO** Write me 15 CTAs about [topic].

**ONE** Write me 15 CTAs about [topic]. Example: "Claim your bonus — code PROMPTGOLD."

**FEW** Write me 15 CTAs about [topic]. Here are 5 examples in the style I want: [ex 1] [ex 2] [ex 3] [ex 4] [ex 5].

## WRITING STYLES

Drop one into your prompt: *"Write in a \_\_ tone."*

Formal

Informal

Persuasive

Descriptive

Humorous

Narrative

Inspirational

Confrontational

Journalistic

Conversational

Authoritative

Empathetic

## CLONE YOUR VOICE

1. Paste 2–3 samples of your writing.
2. Ask: *"Analyze the tone and style. Output a bullet-pointed style guide."*
3. Save that style guide as a reusable system prompt.
4. Use it: *"Rewrite [text] using the style guide above."*

## TOP MARKETING USE CASES

- **Content strategy:** "Build a 30-day social calendar for [brand]."
- **Pricing:** "Stress-test these 3 pricing tiers against [persona]."
- **Outreach:** "Write 5 cold emails to [ICP] referencing [hook]."
- **LP feedback:** "Audit this landing page copy for conversion."
- **SEO:** "Generate 30 long-tail keywords for [topic]."
- **Interview prep:** "Roleplay a hiring manager at [company]."
- **Competitor analysis:** "Compare [A] vs [B] on positioning."
- **Captions:** "Regenerate this for LinkedIn / Twitter / IG."

## CHAINED WORKFLOW (SEO BLOG POST)

- 1 Generate an SEO outline for keyword **[topic]**.
- 2 Write 10 persuasive headlines from that outline.
- 3 Draft subheadings for each section.
- 4 Surface 30 keywords to weave in naturally.
- 5 Write 15 CTAs.
- 6 Combine winners into a full draft.
- 7 Rewrite in the voice of **[role / brand]**.

## MIDJOURNEY PROMPT BUILDER

- 1 **Prep:** "I'll give you formatting examples for Midjourney."
- 2 **Format:** Paste the Midjourney structure (subject, style, lighting, camera, params).
- 3 **Samples:** Drop in 2-3 high-quality MJ prompts.
- 4 **Context:** "Now generate 5 prompts for [scene]."
- 5 **Ship:** Copy → paste into Midjourney.

## PRO TIPS MOST PEOPLE MISS

- Ask for output as `CSV` or `JSON` — paste straight into Sheets / code.
- Ingredients > recipes. Feed it your raw data and let it cook.
- Make it argue with itself: *"Now critique that answer harshly."*
- Always fact-check with a second engine (Perplexity, Claude, Gemini).
- "Ask me 5 questions before answering" → dramatically better output.
- Save your best prompts as reusable templates.
- Specify length: *"Reply in under 100 words."*
- For long tasks, ask for a plan first, then approve before execution.

## AI GLOSSARY FOR NON-TECH PEOPLE

|                 |                                                    |
|-----------------|----------------------------------------------------|
| <b>Prompt</b>   | The instructions you give the AI.                  |
| <b>Input</b>    | Text, image, or file you provide.                  |
| <b>Output</b>   | What the AI gives back.                            |
| <b>Token</b>    | A chunk of text (~4 chars). Models bill by token.  |
| <b>Context</b>  | Everything the model can "see" right now.          |
| <b>LLM</b>      | Large Language Model (e.g. GPT-4, Claude, Gemini). |
| <b>Training</b> | Teaching the model patterns from huge datasets.    |

|                      |                                                      |
|----------------------|------------------------------------------------------|
| <b>Fine-tune</b>     | Custom-train a model on your own examples.           |
| <b>Generative</b>    | AI that creates new content (text, image, video).    |
| <b>Temperature</b>   | Creativity dial. Low = safe, high = wild.            |
| <b>Hallucination</b> | When the AI invents facts confidently.               |
| <b>Agent</b>         | An AI that uses tools and takes multi-step actions.  |
| <b>RAG</b>           | Retrieval-Augmented Generation — pulls in real data. |
| <b>System prompt</b> | The hidden master instructions for the AI.           |

### MAKE IT SHARPER

- Add a target audience
- Add a word/length limit
- Specify the output format
- Give 2-3 examples
- Set a constraint ("no clichés")

### FIX A BAD ANSWER

- "Be more specific."
- "Cut the fluff. Half the length."
- "Try 3 different angles."
- "Rewrite as if for a skeptic."
- "Now critique your last answer."

### WHEN TO USE WHAT

- **ChatGPT:** drafts, brainstorming
- **Claude:** long docs, analysis, code
- **Perplexity:** facts + sources
- **Midjourney:** images
- **Runway / Kling:** video
